## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

Claims 26 and 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language.

This claim is an omnibus type claim.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-27 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-27 of U.S. Patent No. 6113318. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are identical except for the instant claims call for a pinless block and top and bottom surfaces as opposed to first and second surfaces in 6,113,318. It would have been considered obvious to replace first and second surfaces with top and bottom since the claims of 6,113,318 calls for side surfaces and first and second surfaces, it is obvious that these surfaces are the top and

bottom. Also, it would have been considered obvious to include the term pinless since the blocks described in 6,113,318 are pinless.

Claims 1-27 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-25 of U.S. Patent No. 5,795,105. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are identical except for the instant claims call for a pinless block and top and bottom surfaces as opposed to first and second surfaces in 5,795,105. It would have been considered obvious to replace first and second surfaces with top and bottom since the claims of 5,795,105 calls for side surfaces and first and second surfaces, it is obvious that these surfaces are the top and bottom. Also, it would have been considered obvious to include the term pinless since the blocks described in 5,795,105 are pinless.
